## Preliminary note

This publication "Data to the Indicator Report 2016" is a supplement to the Indicator Report 2016 on sustainable development in Germany. It provides not only the annual series pertaining to the sustainability indicators, but also supplies annual series relating to other interesting aspects relating to the sustainability indicators. Background information mentioned in the indicator report is extended in order to increase the informational value and the transparency of the sustainability indicators.

In addition to (1) with the definition of the respective indicator, these pages contain (2) the data series pertaining to the indicator (in bold print) and the data series of the other curves shown in the charts. Item supplementary data (3) offers important additional information which may be useful for interpreting the indicator data and in the most instances is mentioned in the texts. Sometime further sources of information are listed apart from the data sources.

## List of abbreviations

BMEL = Bundesministerium für Ernährung und Landwirtschaft  
(Federal Ministry for Food and Agriculture)

DAX = Deutscher Aktienindex  
(German share index)

EU = European Union

e.V. = eingetragener Verein  
(registered association)

CO<sub>2</sub> = carbon dioxide

% = percent

ha = hectare

kg = kilogram

m<sup>2</sup> = square metre

km<sup>2</sup> = square kilometre

µg = microgram

## Explanation of symbols

0 = less than half of 1 in the last digit occupied, but more than zero

– = no figures or magnitude zero

... = data will be available later

/ = no data because the numerical value is not sufficiently reliable

. = numerical value unknown or not be disclosed

## Contents

	Page
<b>1            No poverty</b>	
Poverty – <i>Reducing poverty</i>	
1.1.a, b     Material deprivation and Severe material deprivation	9
<b>2            Zero hunger</b>	
Farming – <i>Environmentally sound production in our cultivated landscapes</i>	
2.1.a       Nitrogen surplus in agriculture	10
2.1.b       Organic farming	12
<b>3            Good health and well-being</b>	
Health and nutrition – <i>Living healthy longer</i>	
3.1.a, b     Premature mortality	14
3.1.c, d     Smoking rate among adolescents and adults	16
3.1.e       Obesity rate among adolescents	18
3.1.f       Obesity rate among adults	19
Air pollution – <i>Keeping the environment healthy</i>	
3.2.a       Emissions of air pollutants	20
3.2.b       Share of the population with excessive exposure to PM <sub>10</sub> in Germany	21
<b>4            Quality education</b>	
Education – <i>Continuously improving education and vocational training</i>	
4.1.a       Early school leavers (18- to 24-year-olds leaving school without graduation)	22
4.1.b       30- to 34-year-olds with a tertiary or post-secondary non-tertiary level of education	24
Prospects for families – <i>Improving the compatibility of work and family life</i>	
4.2.a, b     All-day care provision for children	26
<b>5            Gender equality</b>	
Equality – <i>Promoting equal opportunities in society</i>	
5.1.a       Gender pay gap	29
5.1.b       Women in management positions in business	31
Equality – <i>Strengthening the economic participation of women globally</i>	
5.1.c       Vocational qualification of girls and women through German development cooperation	32

<b>6</b>	<b>Clean water and sanitation</b>	
Water quality – Reducing the pollution of water with substances		
6.1.a	Phosphorus in flowing waters	33
6.1.b	Nitrate in groundwater	34
Drinking water and sanitation – Better access to drinking water and sanitation worldwide, higher (safer) quality		
6.2	Development cooperation for drinking water and sanitation	35
<b>7</b>	<b>Affordable and clean energy</b>	
Resource conservation – Using resources economically and efficiently		
7.1.a, b	Final energy productivity and Primary energy consumption	36
Renewable energies – Strengthening a sustainable energy supply		
7.2.a, b	Share of renewable energies in gross final energy consumption and Share of renewable energy sources in electricity consumption	38
<b>8</b>	<b>Decent work and economic growth</b>	
Resource conservation – Using resources economically and efficiently		
8.1	Raw material input productivity	40
Government debt – Consolidating public finances – Creating intergenerational equity		
8.2.a, b	Government deficit, Structural deficit	41
8.2.c	Government debt	43
Provision for future economic stability – Creating favourable investment conditions – Securing long-term prosperity		
8.3	Gross fixed capital formation in relation to GDP	44
Economic output – Combining larger economic output with environmental and social responsibility		
8.4	Gross domestic product per capita	46
Employment – Boosting employment levels		
8.5.a, b	Employment rate	48
Global supply chains – Enabling decent work worldwide		
8.6	Number of members of the Textile Partnership	50
<b>9</b>	<b>Industry, Innovation und Infrastructure</b>	
Innovation – Shaping the future with new solutions		
9.1	Private and public spending on research and development	51
<b>10</b>	<b>Reduced inequalities</b>	
Equal educational opportunities – Educational success of foreigners in German schools		
10.1	Foreign school graduates	53
Distributive justice – Preventing too-great inequality within Germany		
10.2	Gini coefficient of income distribution	55

<b>11</b>	<b>Sustainable cities and communities</b>	
Land use – <i>Sustainable land use</i>		
11.1.a	Built-up area and transport infrastructure expansion	56
11.1.b	Loss of open space	57
11.1.c	Settlement density	58
Mobility – <i>Guaranteeing mobility – Protecting the environment</i>		
11.2.a	Final energy consumption in freight transport	59
11.2.b	Final energy consumption in passenger transport	61
11.2.c	Population-weighted average travel time with public transport from each stop to the next medium-sized/large city	63
Housing – <i>Affordable housing for all</i>		
11.3	Housing cost overload	64
<b>12</b>	<b>Responsible consumption and production</b>	
Sustainable consumption – <i>Making consumption environmentally and socially compatible</i>		
12.1.a	Market share of goods certified by independently verified sustainability labelling schemes	65
12.1.b	Energy consumption and CO <sub>2</sub> emissions from private household consumption	66
Sustainable production – <i>Increasing the proportion of sustainable production</i>		
12.2	EMAS eco-management	68
<b>13</b>	<b>Climate action</b>	
Climate protection – <i>Reducing greenhouse gases</i>		
13.1.a	Greenhouse gas emissions	70
Climate protection – <i>Germany's contribution to international climate finance</i>		
13.1.b	International climate finance for the reduction of greenhouse gases and adaption to climate change	72
<b>14</b>	<b>Life below water</b>	
Protecting the oceans – <i>Protection and sustainable use of oceans and marine resources</i>		
14.1.a	Nitrogen input into Baltic and North Sea via German inflows	73
14.1.b	Share of sustainably fished fish stocks in the North and Baltic Sea	75
<b>15</b>	<b>Life on land</b>	
Biodiversity – <i>Conserving species – Protecting habitats</i>		
15.1	Species diversity and landscape quality	76
Ecosystems – <i>Protecting ecosystems, conserving ecosystem services and preserving habitats</i>		
15.2	Eutrophication of ecosystems	77
Forests – <i>Preventing deforestation</i>		
15.3	Payments to developing countries for the verified preservation or restoration of forests under the REDD+ rulebook	78

**16 Peace, justice and strong institutions**Crime – *Further increasing personal security*

16.1	Criminal offences	79
------	-------------------	----

Peace and security – *Practical action to combat proliferation, especially of small arms*

16.2	Number of projects to secure, register and destroy small arms and light weapons carried out by Germany in affected regions of the world	81
------	---	----

Good governance – *Combating corruption*

16.3.a, b	Corruption Perceptions Index in Germany and in partner countries in the German development cooperation	82
-----------	--	----

**17 Partnerships for the goals**Development cooperation – *Supporting sustainable development*

17.1	Share of expenditure for official development assistance in gross national income	84
------	---	----

Knowledge transfer, especially in technical areas – *Sharing knowledge internationally*

17.2	Number of students and researchers from developing countries and LDCs per year	86
------	--	----

Opening markets – *Improving trade opportunities for developing countries*

17.3	Share of imports from LDCs in total imports to Germany	87
------	--	----

**1 No poverty**  
Poverty – Reducing poverty

**1.1.a Material deprivation**

**1.1.b Severe material deprivation**

**1. Definition**

Material deprivation describes the lack of specific consumer goods and the involuntary foregoing of discretionary consumption for final reasons. The two indicators represent the proportion of people out of the total population who are deemed to suffer material deprivation (1.1.a) or severe material deprivation (1.1.b). The designation of (severe) material deprivation applies to all people whose household meets at least three (severely materially deprived: at least four) of nine defined criteria reflecting the financial restriction of the household.

**2. Data on the time series of the indicator**

Specification	2010	2011	2012	2013	2014	2015 <sup>1</sup>
Shares in %						
Materially deprived persons in Germany.....	11.1	12.4	11.3	11.6	11.3	10.7
Severely materially deprived persons in Germany.....	4.5	5.3	4.9	5.4	5.0	4.4
Shares in %						
Materially deprived persons in EU-28.....	17.8	18.5	19.7	19.5	18.5	16.9
Severely materially deprived persons in EU-28.....	8.4	8.8	9.9	9.6	8.9	8.1

**3. Supplementary data**

Specification	2010	2011	2012	2013	2014	2015

## 2 Zero hunger

Farming – Environmentally sound production in our cultivated landscapes

### 2.1.a Nitrogen surplus in agriculture

#### 1. Definition

The indicator represents the annual nitrogen surplus for the agricultural sector, calculated as nitrogen input minus removal of nitrogen, in kilograms per hectare of land utilised for agriculture.

#### 2. Data on the time series of the indicator

Specification	1990	1991	1992	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
kg/ha agricultural land																		
Nitrogen surpluses in Germany																		
Moving five-year average 1.....	–	–	124	111	111	108	105	105	103	102	98	96	97	96	95	95	...	...
Year 2.....	149	124	119	119	104	109	109	97	103	106	100	102	81	92	109	95	97	84
memorandum item:																		
Moving three-year average 3.....	–	131	119	112	111	108	105	103	102	103	103	94	92	94	99	100	92	...

1 The moving five-year average was calculated from the total balance referring to the center year.

2 Data for 1990 partly uncertain, for 2014 partly preliminary.

3 The moving three-year average was calculated from the total balance in the given year, the previous year and the following year.

## 2 Zero hunger

Farming – Environmentally sound production in our cultivated landscapes

### 2.1.b Organic farming

#### 1. Definition

The indicator shows the share of total utilised agricultural land in Germany that is cultivated by organically managed farms subject to the inspection system by the EU legislation on organic framing (Regulation (EC) No. 834/2007 and the implementing rules). It includes land that has been fully converted to organic management as well as areas still undergoing conversion.

#### 2. Data on the time series of the indicator

Specification	1999	2000	2001 <sup>1</sup>	2002	2003	2004	2005 <sup>1</sup>	2006	2007	2008	2009	2010 <sup>2,3</sup>	2011	2012 <sup>1</sup>	2013	2014	2015
Land use for organic farming as proportion of total farming land in %																	
Data from the Federal Statistical Office.....	2.9	–	3.6	–	4.3	–	4.6	–	5.1	–	–	5.6	–	5.8	6.0	6.2	6.3
Comparable results from BMEL.....	2.6	3.2	3.7	4.1	4.3	4.5	4.7	4.9	5.1	5.4	5.6	5.9	6.1	6.2	6.4	6.3	6.5

1 For the total of agriculturally used area: representative results.

2 Until 2007 farms with 2 hectare agricultural used area at least, since 2010 with 5 hectare at least or with special fruits or husbandry, if fixed minimum size is achieved or exceeded.

3 Poor permanent grasslands and permanent grasslands taken out of production until 2007 included in the position 'permanent grassland' and since 2010 in the position 'other lands'.

#### 3. Supplementary data

Specification	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015

### 3.1.f Obesity rate among adults

#### 1. Definition

The indicator shows the proportion of adults (aged 18 years and older) suffering from obesity in the total adult population.

Obesity is calculated with the help of the Body Mass Index (BMI), which is calculated by dividing the body weight in kilograms by the square of an individual's height in metres.

People with a BMI of 25 and above are classified according to the WHO as "overweight" and those with a BMI of 30 as "obese".

#### 2. Data on the time series of the indicator

### 3 Good health and well-being

Air pollution – Keeping the environment healthy

#### 3.2.b Share of the population with excessive exposure to PM<sub>10</sub> in Germany

##### 1. Definition

The indicator shows the number of persons who are exposed at their place of residence to an annual average of or more than 20 micrograms ( µg) of PM<sub>10</sub> particulate matter (dust particles with a diameter less than 10 µm) per m<sup>3</sup> of air.

#### 4 Quality education

Education – Continuously improving education and vocational training

##### 4.1.a Early school leavers (18- to 24-year-olds leaving school without graduation)

###### 1. Definition

The indicator specifies the proportion of 18- to 24-year-olds from all people of the same age group who currently do not attend any school or institution of higher education, who are not attending any further education programmes and who have not completed second-stage secondary school (ISCED level 3-university entrance level or completed course of vocational training).

###### 2. Data on the time series of the indicator

Specification	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015

#### 4 Quality education

Education – Continuously improving education and vocational training

##### 4.1.b 30- to 34-year-olds with a tertiary or post-secondary non-tertiary level of education

###### 1. Definition

The indicator specifies the proportion of 30- to 34-year-olds who hold a certificate from the tertiary education sector (level 5 to 8 of the ISCED 2011) or a post-secondary non-tertiary certificate (level 4 of the ISCED).

###### 2. Data on the time series of the indicator

Specification	1999	2000	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015

ISCED = International Standard Classification of Education

1 Results of Microcensus.

2 Until 2013 ISCED 97, the indicator refers to ISCED-level 4, 5A, 5B and 6. As of 2014 revised ISCED. The indicator refers to ISCED-level 4, 5, 6, 7 and 8.

3 Until 2013 ISCED 97, the indicator refers to ISCED-level 5A, 5B and 6. As of 2014 revised ISCED. The indicator refers to ISCED-level 5, 6, 7 and 8.

4 To 2004 EU-27, from 2005 EU-28.

5 Share of 25- to 34-year-old university graduates, according to (ISCED 5A/6); excluding universities of applied administrative sciences.

6 Examinations for diploma and appropriate examinations, since academic year 2007 university degree (without teaching examinations) excluding bachelor and master degrees.

7 Examinations for teaching degree, for a doctorate, other degrees, degree of arts, degree from advanced technical college ("Fachhochschule"); since academic year 2007 bachelor and master degrees from examination for arts or and from examinations.

8 Since 2011 graduates with a master degree are not accounted for first graduates.

Note on footnotes 6 and 7:

As of winter semester 2007/2008, the classification of examinations of higher education statistics was completely revised. In this context, the groups of examinations "Bachelor's degree" and "Master's degree" were deleted and the final examinations contained in them were allocated to other groups of examinations, e. g. "Bachelor's degree (U)" from "Bachelor's degree" to "University degree (without teaching examinations)".

Prospects for families – Improving the compatibility of work and family life

### 4.2.a, b All-day care provision for children

#### 1. Definition

The indicator shows the proportion of children in all-day care among all children of the same age group. In this context, all-day care refers to a duration of more than seven hours. Day care in private homes is not taken into account. Indicator 4.2.a refers to the group of 0- to 2-year-olds. Indicator 4.2.b refers to 3- to 5-year-old children.

#### 2. Data on the time series of the indicator

Specification	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016

## 6 Clean water and sanitation

Water quality – Reducing the pollution of water with substances

### 6.1.a Phosphorus in flowing waters

#### 1. Definition

The indicator specifies the share of those monitoring points at which the benchmark values for phosphorus in flowing waters for a good ecological status in specific types of bodies of water are observed.

#### 2. Data on the time series of the indicator

Specification	1990	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
	Share of monitoring points at which the benchmark value <sup>1</sup> for a good ecological status is observed, in %															
Phosphorus in flowing waters.....	17.5	28.3	28.6	26.6	30.9	31.8	30.4	33.5	30.6	32.9	33.3	31.9	37.5	35.4	35.9	34.8

#### 3. Supplementary data

Specification	1990	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
	Share of monitoring points in %															
Monitoring points below the benchmark value.....	17.5	28.3	28.6	26.6	30.9	31.8	30.4	33.5	30.6	32.9	33.3	31.9	37.5	35.4	35.9	34.8
Monitoring points with average concentrations <sup>2</sup> .....	17.5	46.1	45.6	50.5	48.0	44.8	51.0	50.2	55.5	56.1	50.2	59.4	50.2	54.3	58.5	55.9
Monitoring points were in the range of up to four times the benchmark value.....	35.7	24.2	24.0	21.6	18.4	21.1	16.6	13.8	11.4	9.3	14.1	6.8	10.0	8.2	3.6	6.9
Monitoring points with higher concentrations.....	29.4	1.4	1.8	1.4	2.7	2.2	2.0	2.5	2.4	1.7	2.4	2.0	2.4	2.1	2.0	2.4

1 The benchmark value should match the good ecological status of the type of water body which is published in Annex 7 of the Ordinance on the Protection of Surface Waters.

The vast majority of flowing water uses the benchmark value of 0.1 mg/l of phosphorous. In organic substrate-dominated rivers, the benchmark value is 0.15 mg/l, for marshland streams 0.3 mg/l and for transitional waters influenced by tidal movement 0.045 mg/l.

2 Extending up to double the benchmark value.

#### 4. Further information

## 7 Affordable and clean energy

Resource conservation – *Using resources economically and efficiently*

### 7.1.a Final energy productivity

### 7.1.b Primary energy consumption

#### 1. Definition

The indicator "Final energy productivity" shows the trend of value added per unit of final energy used. The concept of "final energy" refers to the part of the energy that is used energetically in form of thermal or electric energy in the production sectors for the manufacturing of goods or by private households.

Primary energy consumption specifies how much energy was consumed by a country in the energy sectors for conversion purposes on the one hand, and by production activities, transport and private households on the other.

#### 2. Data on the time series of the indicator

Specification	2008	2009	2010	2011	2012	2013	2014	2015 <sup>1</sup>

## 7 Affordable and clean energy

### Renewable energies – Strengthening a sustainable energy supply

#### 7.2.a Share of renewable energies in gross final energy consumption

#### 7.2.b Share of renewable energy sources in electricity consumption

##### 1. Definition

7.2.a The indicator expresses the generation of renewable energies relative to gross final energy consumption. Gross final energy consumption covers energy consumption by the end consumers and the losses arising during the generation and transportation of energy.

7.2.b The indicator reflects the share of electricity from renewable energy sources in gross electricity consumption.

##### 2. Data on the time series of the indicator

Specification	1990	2000	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015 <sup>1</sup>

Share of primary energy consumption 9.....	1.3	2.9	5.3	6.3	7.9	8.0	8.9	9.9	10.8	10.3	10.8	11.5	12.5	

1 Preliminary results, from February 2016.

2 In the case of pumped-storage power plants, electricity generated from natural inflow only.

3 Solid and liquid biomass, biogas, landfill and sewage gas, biogenic wastes (estimated share in waste incineration plant 50%).

4 Including biogenic share of waste; reduction in 2008 compared to previous year due to methodological changes; as of 2010 including sewage sludge; data on sector of business, trade and services is available as of 2013.

5 Including consumption of biodiesel in the agriculture.

6 Biogas including biomethane, sewage and landfill gas.

7 Including heat from deep geothermics and the renewable heat recovered by heat pumps (air/water, water/water, brine/water, process water and gas heat pumps)

8 Consumption of biodiesel in the transport sector.

9 Based on efficiency method.

## 8 Decent work and economic growth

Resource conservation – *Using resources economically and efficiently*

### 8.1 Raw material input productivity

#### 1. Definition

The indicator for raw material input productivity compares the value of all goods submitted for final use (in EUR, price-adjusted) relative to the mass of the raw materials used domestically and abroad for their production (in tonnes). Final use covers all three, domestic consumption and domestic investment as well as exports.

The denominator of the indicator takes into account abiotic and biotic raw materials from the environment as well as plant materials produced by farming and forestry.

#### 2. Data on the time series of the indicator

Specification	2000	...	2008	2009	2010	2011
2000 = 100						
Value of final use (price-adjusted) relative to raw material extraction and imports in raw material equivalents.....	100		115.4	122.1	116.8	119.6
Raw material extraction and imports in raw material equivalents .....	100		104.0	92.5	102.8	105.0
Value of final use (price-adjusted) 1.....	100		120.0	112.9	120.1	125.5

1 Equivalent to price-adjusted gross domestic product plus the value of imports.

## 8 Decent work and economic growth

Government debt – Consolidating public finances – Creating intergenerational equity

### 8.2.a Government deficit

#### 8.2.b Structural deficit

##### 1. Definition

The indicators show the governmental funding balance (deficit or surplus) and the structural funding balance in relation to gross domestic product (GDP) at current prices.

The governmental funding balance is calculated from revenue minus government expenditure. The annual structural balance refers to the part of the funding balance that cannot be attributed to cyclical fluctuations and temporary effects.

##### 2. Data on the time series of the indicator

Specification	1991	1995	2000	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015

1 The government deficit is mathematically presented by a positive value as a "negative deficit" does not make sense. A surplus (and hence a positive balance) is therefore represented by a minus.

2 Compared to the unadjusted funding balance. Differentiated according to the ESA95.

3 1995: excluding acquisition of debts from the former "Treuhand", 2000: excluding revenues from the sale of UMTS licenses at auction; deficit net-adjusted: 1995: -179.0 Euro bn; 2000: 18.2 Euro bn.

4 At current prices.

## 8 Decent work and economic growth

Government debt – *Consolidating public finances – Creating intergenerational equity*

### 8.2.c Government debt

#### 1. Definition

The indicator shows the national debt as defined by the Maastricht Treaty as a ratio to gross domestic product (GDP) at current prices.

The indicator therefore serves as a measure of government debt.

#### 2. Data on the time series of the indicator

Specification	1991	1995	2000	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015

## 8 Decent work and economic growth

Economic output – Combining larger economic output with environmental and social responsibility

### 8.4 Gross domestic product per capita

#### 1. Definition

The indicator shows the price-adjusted gross domestic product per inhabitant in Germany.

Gross domestic product (GDP) measures the value of all goods and services produced in the domestic economy; inhabitants are all those people whose permanent residence is in Germany.

#### 2. Data on the time series of the indicator

Specification	1991	1995	2000	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014 <sup>1</sup>	2015 <sup>1</sup>

## 8 Decent work and economic growth

Employment – Boosting employment levels

### 8.5.a, b Employment rate

8.5.a: Employment rate, total (20 - 64 years)

8.5.b: Employment rate, older age group (60 - 64 years)

#### 1. Definition

The indicators specify the proportions of people in work aged between 20 and 64 years (8.5.a) and aged between 60 and 64 years (8.5.b), measured in each case as share of the total population of the same age group.

#### 2. Data on the time series of the indicator

## 10 Reduced inequalities

Equal educational opportunities – Educational success of foreigners in German schools

### 10.1 Foreign school graduates

#### 1. Definition

The indicator shows the proportion of foreign school graduates as a percentage of all foreign school leavers within one school year.

In this case, the term "graduates" refers to people who leave general education schools with at least a *Hauptschulabschluss*.

#### 2. Data on the time series of the indicator

Specification	1996	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
%

## 11 Sustainable cities and communities

Mobility – Guaranteeing mobility – Protecting the environment

### 11.2.b Final energy consumption in passenger transport

#### 1. Definition

Final energy consumption in passenger transport represents energy consumption due to the carriage of people by rail, by air, by road (public and private transport) within Germany.

#### 2. Data on the time series of the indicator

Specification	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014 <sup>1</sup>
2005 = 100

Housing – *Affordable housing for all*

### 11.3 Housing cost overload

#### 1. Definition

The indicator shows the share of people who live in households that spend more than 40 % of their disposable household income on living expenses. Living expenses in this case are net rent not including heating, ancillary costs, energy costs and expenditure on water supply as well as value-maintaining investments and interest payments on loans in the case of home ownership.

#### 2. Data on the time series of the indicator

Specification	2010	2011	2012	2013	2014	2015
	%					
Share of people in households that spend more than 40 % of their disposable income on living expenses.....	14.5	16.1	16.6	16.4	15.9	15.6

1 Near real-time forecast by the German Environment Agency.

2 Excluding emissions from land use, land use changes and forestry (LULUCF) as well as from biomass.

Calculated using the territorial concept (emissions on German territory, that is: including foreign business units located within Germany and excluding German business units located outside of Germany).

## 16 Peace, justice and strong institutions

Peace and security – *Practical action to combat proliferation, especially of small arms*

### 16.2 Number of projects to secure, register and destroy small arms and light weapon carried out by Germany in affected regions of the world

#### 1. Definition

The indicator shows the number of projects to secure, register and destroy small arms and light weapons carried out in Africa, Eastern Europe, Latin America and Asia with German financial support.

#### 2. Data on the time series of the indicator

Specification	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
	Number of projects									
Secure, register and destroy small arms and light weapons .....	8	6	8	2	3	11	15	14	15	26

**16 Peace, justice and strong institutions**  
 Good governance – Combating corruption

**16.3.a Corruption Perceptions Index in Germany**

**16.3.b Corruption Perceptions Index in partner countries in the German development cooperation**

**1. Definition**

The indicators provide the Corruption Perceptions Index (CPI) from Transparency International for Germany (16.3.a) as well as the number of partner countries in the German development cooperation, whose CPI has improved compared with 2012 (16.3.b). The CPI measures how strongly corruption in the public sector is perceived in a country.

**2. Data on the time series of the indicator**

Specification	2012	2013	2014	2015
Rating for Germany .....	79	78	79	81
Number of partner countries of German development cooperation whose rating has improved compared with 2012 .....	.	17	37	41

## 17 Partnerships for the goals

Knowledge transfer, especially in technical areas – *Sharing knowledge internationally*

### 17.2 Number of students and researchers from developing countries and LDCs per year

#### 1. Definition

The indicator records the number of students and researchers from developing and emerging countries per year or semester.

Here, the number of students and researchers from the least developed countries (LDCs) is listed separately.

#### 2. Data on the time series of the indicator

Specification	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015 <sup>1</sup>
