Notes:

• The "Life in Europe" survey (EU-SILC), which had previously been conducted separately, was integrated into the micro census as a sub-sample in 2020. Due to the change from a voluntary survey to a survey requiring information in part, combined with a new sample composition, it is not possible to compare the data of the survey year 2020 with previous years (break in time series).

• 2021 provisional data.

• People disposing of less than 60 % of the median equivalised income of the population.
